Y7 & Y8 Textiles Course Information

Key Stage 3 Textiles

The aim of Year 7 & 8 Textiles is to introduce students to a range of practical skills designed to help develop their motor skills, particularly hand to eye co-ordination. This will be done by working on a practical project during lesson time. All students in Year 7&8 will have half a year in Textiles (1 lesson a week). Students will build up their practical skills through a design & make project where they will increase their knowledge & understanding of researching and textiles construction. Design and practical work will be marked on a regular basis and the combination of those marks will be used to judge progress.

Assessment:

Students will be assessed on their practical skills, their generation and development of ideas and analysis and evaluation of ideas. Literacy is also very important & students will develop the ability to communicate ideas visually and verbally.

Homework:

There will be four homework tasks set over the course and each will link into work done in the classroom

1. Researching their project
2. Collecting materials & resources for their practical work
3. Homework sheet based on their project
4. Taking practical work home to finish particular sections.

Parental support:

Students are expected to either make a contribution of £1.00 towards the cost of materials used, or provide their own suitable fabrics & materials; this will be discussed with your child in lesson time. Parents can also help by encouraging their child to sew & cut things out at home, therefore practicing their skills.
